

ENTRY-IN-SERVICE

Objectives of The Practice:

1. It exposes them to a wide variety of available choices through providing students with a vast knowledge bank including questionnaire on English language, general knowledge, logic and reasoning, basic mathematics and other learning skills
2. The wide-ranging repository enables them to identify how to approach various job opportunities beyond their immediate fields of study like banking, insurance sectors, railways, teaching, other public service examinations along with vocational courses so that they may identify their suitable talents and excel in the relevant.
3. Final year students often lack awareness regarding ways to prepare themselves for Competitive examinations. This empowers them to tackle this problem head on.

The Practice:

1. An online portal linked to college website that can be accessed by students through their student ID to prepare themselves for competitive examinations.
2. The mobile friendly app provides model questions on logical reasoning, general knowledge, mathematics and English, along with answers and explanations.
3. Approximately 48000 questions at present can be solved without purchasing any personal books or taking admission in specialized coaching.
4. When students are newly admitted to the College, they are explained about this system in an Orientation programme.
5. Students, irrespective of their career interests, can practice and appear in mock tests through the portal. This helps them to give more importance to conceptual rather than rote learning. This also helps them in improving their English language skills and simultaneously boost their confidence.
6. Scoring well helps the students to develop positive feeling about their abilities. It also acts as motivation for them to always strive for excellence.
7. Online system enables them for extensive practice in their free time and since it is mobile friendly, the preparation can be taken anywhere and anytime.
8. The online portal and mobile-based application enables students to develop their knowledge content and become aware of the procedure and modalities of competitive examinations.

9. The results are not only immediately generated but a result database is created where previous answers and scores of students are available to them so that they may continuously self-assess and evaluate themselves.
10. The correct answers are not only stated but explained so that the student may understand the particular question comprehensively.
11. Mathematical modules on banker's discount prepares students for the financial sector while stocks and shares motivate their skills in investment sectors.
12. Some students may not be able to avail of the online facility due to net based restraints and unavailability of computer or mobile phones. They are encouraged to use the college computers specially assigned for student use

Evidence of Success:

1. Some of the students have joined different public and private enterprises after accessing the materials
2. This has motivated the students to prepare for different competitive examinations.

Problems Encountered and Resources Required:

1. Initially students did not take interest in the system of entry-in-service.
2. Students living in areas with remote internet access face difficulties in accessing the online system.
